

Byron Niblett

Full-Stack Software Engineer

(905) 767-3801 | bniblett@gmail.com | github.com/bniblett | linkedin.com/in/byron-niblett

PROFESSIONAL SUMMARY

Full-stack engineer with almost 20 years of professional experience in web technologies. Specialize in Laravel/PHP back-ends, REST API design, and modern JavaScript front-ends, with strong DevOps instincts: Docker, GitLab CI/CD, server administration, and security hardening. Comfortable owning features end-to-end in Agile teams and running solo client engagements from requirements through deployment.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, Python, SQL, Bash, HTML5, CSS3

Front-End: React, SASS/LESS, Tailwind CSS, Bootstrap

Back-End & APIs: REST APIs (Laravel), Node.js, WordPress

Databases: MySQL, MongoDB

Platforms & Integrations: Laravel, WordPress, Shopify, Yii, Salesforce

DevOps & Tooling: Docker, Git, GitLab CI/CD, Jenkins, Composer, NPM, Microsoft Azure, AWS, Photoshop, Figma

Server & Infrastructure: WHM/cPanel, Cloudflare DNS, Google Workspace admin, security hardening, automated offsite backups

EMPLOYMENT HISTORY

Owner / Freelance Software Developer

August 2021 – Present

Self-Employed — Oshawa, ON

- Build and maintain custom Laravel REST API for 15 active clients, handling authentication, rate-limiting, and third-party integrations.
- Deliver and support multiple WordPress sites with custom themes, plugins, and security hardening; eliminating recurring malware incidents across managed properties.
- Maintain a legacy AngularJS/CoffeeScript platform powering 15+ production websites — bug fixes, dependency upgrades, and incremental feature additions.
- Standardized Docker-based local environments and Composer-managed WordPress installs (theme, plugins, and core deployable in a single command), cutting project setup from hours to minutes.
- Operate full hosting stack: WHM/cPanel, Cloudflare DNS, automated bash-scripted offsite backups, and incident response.

Stack: Laravel, PHP, WordPress, Yii, Docker, JavaScript, MySQL, GitLab CI/CD, Composer. Linux, Photoshop / Illustrator

Software Engineer

March 2021 – August 2021

Red Thread Innovations — Toronto, ON

- Developed ReactJS components for the Red Thread LMS following the Viper design pattern, with full test coverage.
- Contributed to architectural planning and reviewed peer code changes across the engineering team.
- Worked in Scrum, owning tickets from refinement through deployment and sign-off.

Stack: React, TypeScript, Node.js, Docker, SASS, Grunt, WordPress Gutenberg. Figma

Application Engineer

January 2018 – March 2021

WE Charity — Toronto, ON

- Developed features on a custom form framework to support new donation campaigns and international charity trip registrations, handling end-to-end data collection and submission workflows.
- Built and maintained integrations with Salesforce and third-party APIs to sync donor, campaign, and e-commerce data across platforms.
- Reviewed code changes, provided architectural guidance on new features, and authored technical documentation for internal systems.

Stack: PHP, Node.js, ReactJS, MySQL, Docker, WordPress, Azure, Jenkins, Salesforce, Shopify, Figma**Web Developer**

April 2015 – December 2017

DIT Canada — Whitby, ON

- Migrated 50+ websites and applications to upgraded server infrastructure.
- Implemented cybersecurity hardening to protect client data and reduce breach exposure.
- Upgraded legacy websites to current standards, cutting technical debt across the client portfolio.

Stack: PHP, MySQL, Photoshop, WordPress, Plesk, Photoshop**Sr. Web Developer**

April 2013 – September 2014

ALT Media — Whitby, ON

- Led a team of 3 developers to create and deploy websites, applications, and e-commerce solutions for clients.
- Built and maintained client sites using WordPress, Joomla, and Shopify.
- Managed server hosting infrastructure for client websites.

Stack: PHP, MySQL, WordPress, WHM, Photoshop**Web Developer**

February 2008 – August 2012

Metroland Media Group — Oshawa / Vaughan, ON

- Developed WordPress themes, widgets, and plugins for 20+ community news websites serving 3–5 million page views per month.
- Consolidated 100+ websites from 10 servers down to 2, improving stability and reducing infrastructure costs.

Stack: PHP, MySQL, WordPress, Salesforce.

SELECTED PROJECTS

Express Radiant

August 2025 - Current

<https://www.expressradiant.ca> - PHP, Composer, WordPress, Elementor Pro, Linux Hosting (WHM/cPanel)

Lormit

July 2023 - Current

<https://www.lormit.com> - PHP, Composer, WordPress, Elementor Pro, Linux Hosting (WHM/cPanel)

Sacramento State - Hornet Reuse

May 2023 - Current

<https://hornetreuse.csus.edu/#/> - One of many [iWasteNot Systems](#) products that use PHP, Laravel, AngularJS, Node.js, Grunt, Docker

EDUCATION

Web Developer Diploma

Durham College, Oshawa, ON | 2002 – 2005

Continuing Education: Introduction to Python — Durham College (2022)

COMMUNITY LEADERSHIP
