PROFESSIONAL SUMMARY

Full-stack engineer with over 15 years of professional experience in web development. Specialize in Laravel/PHP back-ends, REST API design, and modern JavaScript front-ends, with strong DevOps instincts: Docker, GitLab CI/CD, server administration, and security hardening. Comfortable owning features end-to-end on Agile teams and running solo client projects from requirements through deployment.

TECHNICAL SKILLS

Languages	PHP, JavaScript, TypeScript, Python, SQL, Bash, HTML5, CSS3
Front-End	React, SASS/LESS, Tailwind CSS, Bootstrap
Back-End & APIs	REST APIs (Laravel), Node.js, WordPress
Databases	MySQL, MongoDB
Platforms	Laravel, WordPress, Shopify, Yii, Salesforce
DevOps & Tooling	Docker, Git, GitLab CI/CD, Composer, NPM, Microsoft Azure, AWS, Photoshop, Figma, Jenkins
Servers & Infrastructure	Linux, WHM/cPanel, Plesk, Cloudflare DNS, Google Workspace admin, security hardening, automated offsite backups

EMPLOYMENT HISTORY

Owner / Freelance Software Developer

Aug 2021 – Present

Self-Employed · Oshawa, ON

- Build and maintain a platform that runs 15+ client websites: a custom Laravel REST API (authentication, rate limiting, third-party integrations) and its legacy AngularJS/CoffeeScript front end.
- Deliver and support WordPress sites with custom themes, plugins, and security hardening, which ended recurring malware infections across managed sites. Composer deploys core, theme, and plugins in one command.
- Run the full hosting stack: WHM/cPanel, Cloudflare DNS, and incident response.
- Automate client site backups with Bash scripts that copy each site to off-site storage.
- Write Python scrapers that collect competitor prices for client pricing sheets.

Stack: Laravel, PHP, WordPress, Yii, Docker, JavaScript, Python, Bash, MySQL, GitLab CI/CD, Composer, Linux, Photoshop, Illustrator

Software Engineer

Mar 2021 – Aug 2021

Red Thread Innovations · Toronto, ON

- Built ReactJS components for the Red Thread LMS using the Viper design pattern, with full test coverage.
- Took part in architecture planning and reviewed code across the engineering team.
- Worked in Scrum and owned tickets from refinement through deployment and sign-off.

Stack: React, TypeScript, Node.js, Docker, SASS, Grunt, WordPress Gutenberg, Figma

Application Engineer

Jan 2018 – Mar 2021

WE Charity · Toronto, ON

- Built features on a custom form framework for new donation campaigns and international charity trip registrations, from data collection through submission.
- Built and maintained integrations with Salesforce and third-party APIs to sync donor, campaign, and e-commerce data.
- Reviewed code, gave architecture guidance on new features, and wrote technical documentation for internal systems.

Stack: PHP, Node.js, ReactJS, MySQL, Docker, WordPress, Azure, Jenkins, Salesforce, Shopify, Figma

Web Developer
Apr 2015 – Dec 2017

DIT Canada · Whitby, ON

- Migrated 50+ websites and applications to upgraded server infrastructure.
- Implemented security hardening to protect client data and reduce breach risk.
- Brought legacy client websites up to current standards and paid down their technical debt.

Stack: PHP, MySQL, WordPress, Plesk, Photoshop

Sr. Web Developer
Apr 2013 – Sep 2014

ALT Media · Whitby, ON

- Led a team of 3 developers building and deploying websites, applications, and online stores for clients.
- Built and maintained client sites on WordPress, Joomla, and Shopify.
- Managed the hosting servers for client websites.

Stack: PHP, MySQL, WordPress, WHM, Photoshop

Web Developer
Feb 2008 – Aug 2012

Metroland Media Group · Oshawa / Vaughan, ON

- Developed WordPress themes, widgets, and plugins for 20+ community news websites with 3–5 million page views per month.
- Consolidated 100+ websites from 10 servers down to 2, improving stability and cutting infrastructure costs.

Stack: PHP, MySQL, WordPress, Salesforce

SELECTED PROJECTS

Express Radiant – Redesign
Aug 2025 – Present

expressradiant.ca · Redesigned the site for Canada's Stelrad radiator distributor, with ACF-driven product pages.

Tech: WordPress, Elementor Pro, ACF, PHP, Composer, LiteSpeed, WHM/cPanel

CITAC – Malware Recovery & Hardening

citac-accfc.org · Moved a hacked WordPress site to new hosting, removed the injected code, and locked down permissions.

Tech: WordPress, Elementor Pro, site migration, security hardening

Craig's Cookies – Hero Video

craigscookies.com · Added a full-width hero video with custom mute and play/pause controls to a Shopify bakery store.

Tech: Shopify, Liquid, JavaScript, CSS

Shop The Carbon Bar – Local Delivery

shop.thecarbonbar.ca · Built a postal-code delivery check that adds the matching delivery fee at checkout.

Tech: Shopify, Liquid, JavaScript

iWasteNot Systems Suite – Marketplaces
May 2023 – Present

iwastenotsystems.com · Worked on the API and front end for reuse marketplaces where members give away surplus items.

Tech: Laravel, PHP, REST API, AngularJS, MySQL

WE Charity – Website Rebuild
2018 – 2021

we.org · Helped rebuild the charity's website, turning Figma designs into reusable React components.

Tech: React, TypeScript, Figma

EDUCATION

Web Developer Diploma · Durham College, Oshawa, ON · 2002 – 2005

Continuing Education · Introduction to Python, Durham College · 2022

COMMUNITY LEADERSHIP

Tech Manager (Volunteer)

Whitby Minor Hockey Association · 2012 – 2014. Set up and ran the association's website for team scheduling and family communications.

Web Developer (Volunteer)

Brooklin Redmen Lacrosse Organization · 1998 – 2003. Built and maintained the organization's website during the early web era.
